About

I am a self-taught front-end web developer with a strong passion for creating visually appealing and user-friendly websites. I have dedicated the past three years to learning and honing my skills in web development through self-study, online resources and a ton of personal projects. I am now seeking a full-time role to apply my knowledge and continue to grow as a developer. I am highly motivated and dedicated to the field, and eager to bring my skills to a team of experienced developers.

Skills

Programming Languages

Javascript (ES6+), HTML, CSS/SCSS, Python, SQL

Libraries & frameworks

Projects

Movie-app

[live demo](#)

Web app built with vanilla JavaScript and bootstrap for browsing, searching, filtering and watching online movies. this app was built for the purpose of learning a lot of JavaScript features like making api calls, asynchronous code, practicing higher order functions, and much more. The ui/ux also designed by me on adobe XD.

Minesweeper-game

[live demo](#)

An online logic puzzle game built with vanilla JavaScript. Built to learn and practice functional programming, managing state, applying algorithms and debugging.

Personal Portfolio

[live demo](#)

A fullstack simple website designed on Figma & built with html, scss, vanilla JavaScript & NodeJS on the backend. Purposed to showcase my work, services i provide and contact info for freelance clients and future employees.

for more recent projects checkout my portfolio and my github page.
